

A Question for the Modern Age: Is Google Ruining Our Precious Brains?

On the next page, you will find the article “Is Google Making Us Stupid?”

Read both sides of the debate on this issue and decide your position. If you are not sure of your stance on the issue, do some more research until you come to a decision.

Then, write a four-paragraph opinion piece in which you explain the issue, state your side in the debate, consider the claims of the opposing side, and offer arguments against those specific claims.

Here is a suggested format:

¶1: Explain the issue.

¶2: State your side in the debate and your reasons for taking this side.

¶3: Consider some of the claims/arguments of the opposing side and respond with your own arguments.

¶4: Conclude and restate your position.

If you type this on Google Drive... be careful what you write. (O_O) (the all-seeing eyes of Google)
